Install Quadri Connector for Rhino with Grasshopper

 CONNECTED CONSTRUCTION

Install Quadri Connector for Rhino with Grasshopper

Compatibility:

Rhino with Grasshopper: Tested for Rhino 6 and Grasshopper 1.0.0007. Will be compatible with later versions of Grasshopper as well.

Quadri: Quadri 2020.

To install the connector do the following:

There are two ways to install Quadri Connector for Rhino with Grasshopper:

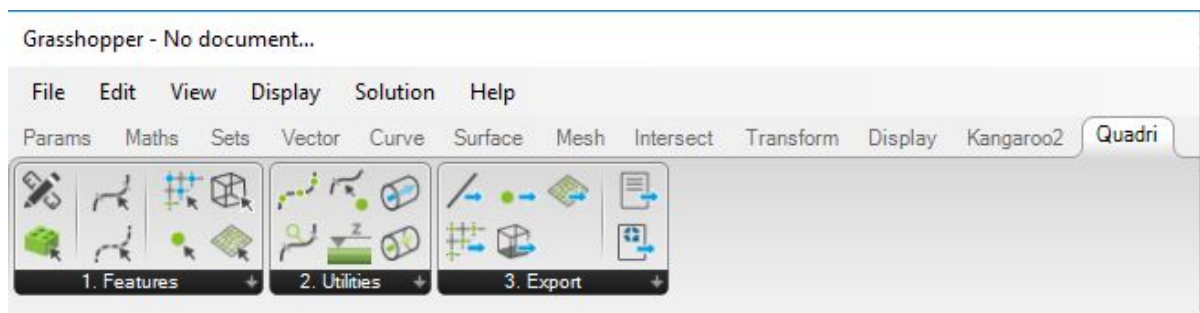

- Manually from a zip-file
- From Package Manager in Rhino

To install manually:

- 1) Unpack the Intall.zip file
- 2) Place .dll-files and .gha-file together here:
C:\Users\\AppData\Roaming\Grasshopper\Libraries\
3) Place the folder RhinoGrasshopperTemplate with its current contents here:

C:\Users\\AppData\Roaming\Trimble\Quadri\22.00\Configuration\Default\ExternalTemplates\Tasks\GeneralDesign

- 4) Start/Restart Rhino and then Grasshopper. The Quadri toolbar will then show up in Grasshopper:

To install from Package Manager:

- 1) Type “Testpackagemanager” on the command line in Rhino and press **Enter**.
- 2) Search for “QuadriGrasshopperConnector” and click on **Download and Install**.
- 3) Start Quadri if it is not already started.
- 4) Insert a Quadri Design Task Selector in the canvas in Grasshopper. This will automatically install the Connector Design Task Template in Quadri
