Install Quadri Connector for Tekla Structures

CONNECTED CONSTRUCTION

Install Quadri Connector for Tekla Structures

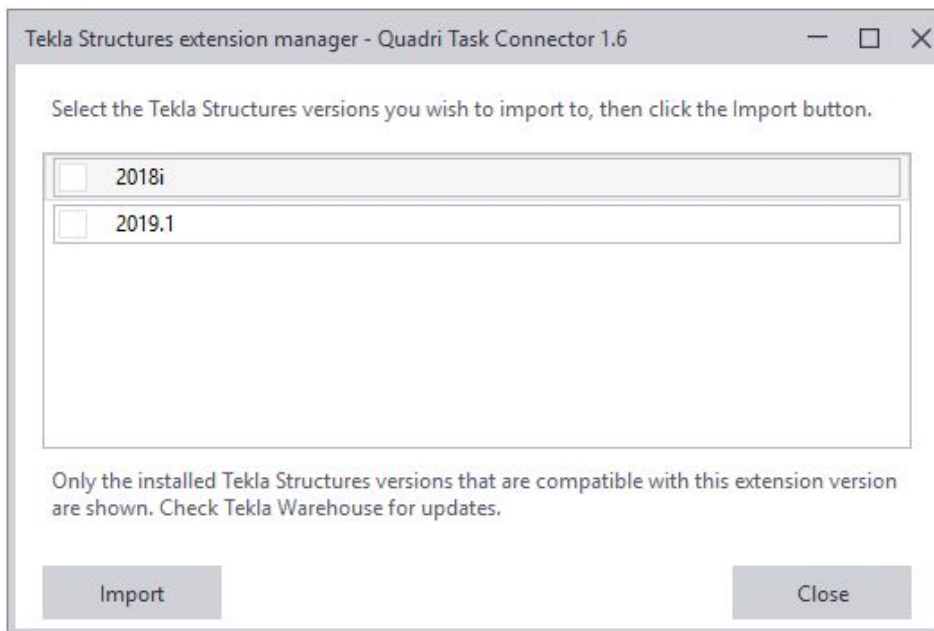

Compatibility:

Tekla Structures: QTC is compatible and tested with Tekla Structures (TS): 2018i, 2019, 2019i. QTC will probably be compatible with later versions as well.

Quadri: Quadri 2020.

To install the connector do the following:

- 1) Unpack the zip file and run (double click on) the contained Quadri_Task_Connector_1.6.tsep file
- 2) A dialog opens showing the installed TS versions on your machine:

- 3) Choose the wanted TS version(s), close the dialog and start/restart TS.
- 4) The Connector will then be available in the Applications & components view inside TS. Double click on the connector symbol to start QTC
