Trimble Identity

Creating a Trimble Identity

A Trimble Identity is required for accessing several Trimble softwares using named user licensing. The Trimble ID will also grant access to a variety of websites and services.

1. To create a Trimble Identity (Trimble ID), go to <https://np.trimble.com/> and click the Create a Trimble ID link.
2. Complete the Create new account form accordingly. If you have several different email addresses, please use your company email address. Once you have completed this form, click on the Create new account button.

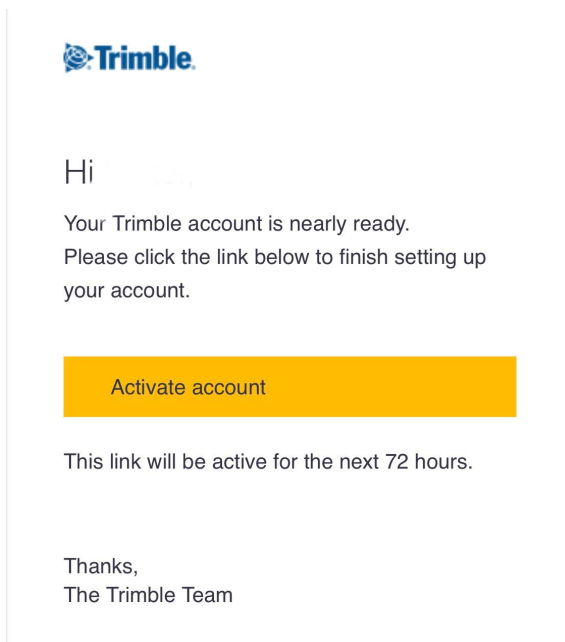

The screenshot shows the 'Create your account' form on the Trimble website. The form is titled 'Create your account' and features the Trimble logo at the top. It contains the following fields and elements:

- First name
- Last name
- Email address
- Password
- A CAPTCHA image showing the word '7n4e2' and a refresh button.
- A text input field with the placeholder text 'Enter the above text.'
- A yellow button labeled 'Create new account.'
- A blue link labeled 'Go back.'

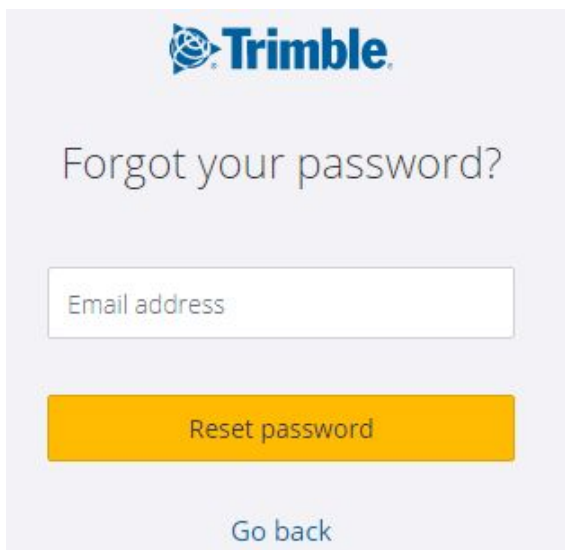

3. Look for a verification email in your inbox from Trimble ID service, and click the link provided to verify your account. You must verify your account in order to access your Trimble Identity. Please note, if you do not get the verification email at all you may need to talk to your IT and have them whitelist the email address shown below.

Note: If you do not receive this email in your inbox, check your Spam/Junk mail folder.

4. Congratulations, your Trimble Identity is now active.

Forgot your password?

1. Fill in your email address and click the Reset password link
2. Check your email inbox for email from Trimble ID service. In the email message, click the Reset password button to set a new password for your Trimble ID.
